

KINETRACE

Privacy Policy

Last Updated: July 2026

1. Introduction & Scope

This Privacy Policy describes how KineTrace ("KineTrace," "we," "us," or "our") collects, uses, stores, and shares information in connection with the KineTrace website, dashboard, application programming interfaces, and related services (collectively, the "Service"). This Policy applies to information collected through the Service, including data captured during in-person or remote Trial Collections and files you upload directly.

This Policy should be read together with our Terms of Service. Capitalized terms not defined in this Policy have the meaning given to them in the Terms of Service.

2. Two Categories of Data: Trial Collection Data vs. Website Uploads

KineTrace handles information differently depending on how it reaches us. It is important to understand this distinction, because different rules apply to each:

- **Trial Collection Data:** movement and physical-context data captured during an organized, in-person or remote Trial Collection session, described in Section 3. This data is retained and used to train and evaluate our machine learning models, as described in Sections 5 and 6.
- **Website Uploads:** files (such as CSV or sensor exports) that a visitor uploads directly through the Service's website for the purpose of viewing that visitor's own analytics, described in Section 4. This data is processed only for the duration of that browser session and is not retained, stored in any database, merged with Trial Collection Data, or used to train any model.

To process kinematic movement data and evaluate the accuracy of our algorithms, KineTrace works with the following categories of information, drawn from one or both of the sources above:

Category	Examples	Source
Inertial sensor data	3D linear acceleration (ax, ay, az); rotational velocity (gx, gy, gz)	Wearable/mobile sensors during a trial
Physical context metrics	Height, weight, age, gender, sport/activity label	Self-reported by participant
Health & physical condition categories	Prior joint injuries, structural gait factors, active soreness	Self-reported, categorical only
System metrics	Upload timestamps, payload sizes, request logs	Automatically generated by backend

3. Trial Collection Data

3.1 What It Is

Trial Collection Data is movement and physical-context information gathered during a supervised Trial Collection session — for example, a club or research session in which a participant wears a sensor and performs specified movements. This data is retained by KineTrace and used to train, validate, and improve our machine learning models, as described in Section 5.

3.2 Anonymous Identification

All Trial Collection Data is logged against randomized, non-identifiable subject identifiers (for example, "sub_01") rather than against a participant's name or other directly identifying information.

3.3 No Direct Identifiers Collected

KineTrace does not collect legal names, government identification numbers, email addresses, or precise GPS location coordinates as part of Trial Collection Data. Physical context and health-category information described in Section 2 is collected and stored only in connection with a randomized subject identifier, not a real name.

3.4 Local Processing Before Upload

Raw sensor exports captured offline (for example, directly from a wearable device) remain local to the collection hardware until they are standardized and submitted for processing and storage by the Service.

3.5 Aggregation and De-Identification

Where feasible, we aggregate or further de-identify Trial Collection Data used for model training so that it cannot reasonably be used to re-identify a specific individual.

4. Website Uploads (Session-Only Processing)

If you visit the KineTrace website and upload your own CSV file or sensor export to view analytics about that file, that upload is handled differently from Trial Collection Data:

- Your file is processed only to generate the analytics displayed back to you during that browser session.
- Your file is not merged with, added to, or used to train or evaluate any machine learning model, and is not combined with Trial Collection Data in any dataset.
- Your file is not written to persistent storage or a database on our end. It is held only transiently (for example, in server memory or a temporary cache) for as long as needed to process your request and return results.
- Your file, and the analytics generated from it, are deleted automatically once your session ends — for example, when you close or navigate away from the page. We do not retain a copy.

Because we do not retain website-uploaded files after your session ends, we are typically unable to recover or provide you with a copy of a previously uploaded file once your session has closed. If you want to keep your original file, keep your own copy before uploading it.

5. How We Use Information

We use Trial Collection Data exclusively to:

- Train, validate, and optimize our machine learning classification models (including models built with tools such as scikit-learn);
- Render real-time movement analytics and visualizations on the KineTrace dashboard;
- Evaluate how physical context and condition categories relate to movement metrics across target activity classes;
- Maintain, secure, debug, and improve the Service; and
- Comply with applicable legal obligations and enforce our Terms of Service.

We use Website Uploads solely to generate and display analytics back to the visitor during that browser session, as described in Section 4. Website Uploads are never used for model training and are never combined with Trial Collection Data.

We do not use the information we collect to make automated decisions that produce legal or similarly significant effects concerning any individual.

6. Legal Basis for Processing

Where applicable data protection law requires a legal basis for processing, we rely on: your consent (for example, when you voluntarily participate in a Trial Collection or choose to upload a file); our legitimate interests in developing, securing, and improving an experimental research and demonstration platform, balanced against your rights; and, where relevant, compliance with a legal obligation. You may withdraw consent at any time as described in Section 10, without affecting the lawfulness of processing carried out before withdrawal.

7. Data Sharing & Third-Party Service Providers

KineTrace does not sell, rent, or trade personal data to third parties or advertisers. We share information only with service providers who process it on our behalf, solely to provide the Service's functionality, including:

- Netlify — frontend application hosting;
- Render — backend API deployment and machine learning model execution.

These providers are contractually restricted from using data for any purpose other than providing services to KineTrace. We may also disclose information if required to do so by law, regulation, legal process, or governmental request, or where we believe disclosure is necessary to protect the rights, property, or safety of KineTrace, our users, or the public.

Should KineTrace undergo a merger, acquisition, or sale of assets, information may be transferred as part of that transaction, subject to commercially reasonable steps to preserve the protections described in this Policy.

8. Data Retention

Trial Collection Data: We retain anonymized Trial Collection Data for as long as it remains useful for model training, evaluation, and demonstration purposes, unless you request deletion as described in Section 10.

Website Uploads: We do not retain Website Uploads beyond the browser session in which they were submitted. Uploaded files and any analytics generated from them are deleted automatically when your session ends (for example, when you close or navigate away from the page), and are not stored in a database or backup system.

System log metadata (such as request timestamps and payload sizes) is retained for a limited period for security and debugging purposes and then routinely purged or aggregated.

9. Data Security

We implement reasonable technical and organizational safeguards designed to protect Trial Collection Data, in-session Website Uploads, and API transmissions from unauthorized access, alteration, disclosure, or destruction, including encryption in transit and access controls on our hosting and deployment infrastructure. Because Trial Collection Data is strictly anonymized at the point of storage, individual records cannot be indexed by personal identity within our systems.

Because KineTrace's source code is publicly source-available (see Section 14), we do not rely on the secrecy of our code as a security measure. Our primary safeguards for Website Uploads are data minimization and non-retention: rather than securing a stored copy of your file, we avoid keeping one in the first place.

No method of transmission or storage is completely secure, and we cannot guarantee absolute security. In the event of a data security incident that affects your information, we will take reasonable steps to notify affected users and relevant authorities as required by applicable law.

10. Your Rights & Choices

Depending on your location, you may have certain rights with respect to information we hold about you, which may include the right to request access to, correction of, or deletion of your data, and the right to object to or restrict certain processing. Because Trial Collection Data is pseudonymized at the point of collection, we may ask you to provide the randomized subject identifier or other information reasonably necessary to locate your data before fulfilling a request.

Participants in a Trial Collection may request deletion of their data at any time by contacting the Developer using the details in Section 16. We will make commercially reasonable efforts to honor deletion requests, except where retention is required to comply with a legal obligation, resolve a dispute, or enforce our agreements, or where data has already been irreversibly aggregated such that individual records can no longer be isolated.

Because Website Uploads are deleted automatically at the end of your session as described in Section 4, there is typically nothing further for us to delete on request once your session has ended — the file and any analytics generated from it are already gone.

11. Children's Privacy

The Service is not directed to individuals under the age of 18, and we do not knowingly collect personal information from children. Where minors participate in a Trial Collection as part of a supervised school, club, or organizational activity, it is the responsibility of the supervising adult to obtain any legally required parental or guardian consent before participation. If we become aware that we have collected information from a child without appropriate consent, we will take reasonable steps to delete that information.

12. International Users & Data Transfers

The Service is hosted using infrastructure providers that may process and store information in countries other than your own. By using the Service, you understand that your information may be transferred to, stored, and processed in a jurisdiction with data protection laws that may differ from those of your home jurisdiction. Where required by applicable law, we take reasonable steps to ensure such transfers are subject to appropriate safeguards.

13. Cookies and Similar Technologies

The Service may use cookies, local storage, or similar technologies necessary for basic functionality, such as maintaining session state within the dashboard. We do not currently use cookies for third-party advertising or cross-site tracking purposes. If this changes, we will update this Policy accordingly.

14. Source-Available Software

KineTrace's source code is publicly available under the PolyForm Noncommercial License 1.0.0, a license designed for source-available (rather than fully open-source) software: it permits anyone to view, copy, and modify the code for noncommercial purposes, but does not permit commercial use. This means that any person can inspect, audit, or independently reconstruct and run the same processing pipeline described in this Policy for noncommercial purposes, including the logic governing how Website Uploads are processed and discarded.

Publishing our source code does not itself expose Trial Collection Data or Website Uploads — the published code is the processing logic, not a copy of any user's data. However, because our processing pipeline is not confidential, you should not rely on the obscurity of our implementation as a privacy safeguard; our commitments regarding what we retain and how long we retain it, as described in Sections 3, 4, and 8, are the operative protections, not the confidentiality of our code.

If you independently deploy or modify a copy of KineTrace's source-available code in accordance with the PolyForm Noncommercial License, that deployment is not operated by us, and this Privacy Policy does not apply to it; the operator of that deployment is responsible for its own data practices.

15. Changes to This Privacy Policy

We may update this Privacy Policy from time to time to reflect changes in our practices, technology, or applicable law. We will revise the "Last Updated" date above when we do, and, for material changes, provide additional notice where appropriate. We encourage you to review this Policy periodically.

16. Contact Us

If you have questions about this Privacy Policy, wish to exercise any of the rights described in Section 10, or would like to request deletion of Trial Collection Data associated with you, please contact the KineTrace Developer through the contact channel designated on the KineTrace website or application.
